

**AAA Strategic Plan Dashboard**

**Mission – Advancing anatomical sciences through research, education, and professional development**

**Vision – Inspiring curiosity, discovery, and innovation**

**Values – Collaboration, Community, Excellence, Integrity, Respect**

<b>Domain</b>	<b>Professional Development</b>	<b>Education</b>	<b>Research</b>	<b>Member Engagement and Community</b>	<b>Public Engagement and Advocacy</b>
<b>Goal</b>	Foster professional growth within anatomical sciences.	Champion and strengthen education in the anatomical sciences.	Promote global recognition in anatomical sciences research.	Foster a welcoming environment that creates an inclusive community through opportunity and engagement of all members.	Promote understanding of anatomical sciences to inform the public and influence policy.
<b>Objectives</b>	Strengthen and expand the anatomical sciences workforce pipeline.	Expand educational offerings based on membership needs.	Sustain and refine trainee and investigator programs to attract and retain scholars.	Create and expand opportunities for volunteering.	Enhance public understanding and perception of anatomical sciences and AAA.
	Develop programming for members of all career stages in all disciplines.	Integration of science across scale into anatomical sciences education.	Support interdisciplinary collaboration across anatomical sciences, biology, and health related fields (life sciences).	Expand mentorship and peer support programs across all career stages.	Leverage strategic partnerships with peer scientific societies to amplify a unified voice in policy and advocacy.
	Provide practical learning that drives growth, confidence, and excellence.	Develop guidelines for new technology with ethical considerations.	Facilitate dissemination of anatomical sciences research through AAA journals, meetings, and communications.	Improve member recruitment, retention, engagement, and belonging.	Expand training in science communication and advocacy to improve engagement with the public and policymakers.
	Develop career-stage resources that establish AAA as a trusted source for professional growth.	Support and promote inclusive learning environments	Provide a home organization for all people interested in anatomical sciences research.	Identify and develop opportunities for cross-disciplinary collaborations.	Promote anatomical sciences to diverse audiences.
		Facilitate the incorporation of evidence-informed pedagogy.	Strengthen systems and resources that support the pursuit of scholarly excellence.
